

The Growit Network

AVAILABILITY ONLINE

Member plant lists are entered by Customer Service when your domain is designed and built. Changes can be made to the list (add/delete plants, change specs, etc) as needed by the Network Member using the Online program. It is the responsibility of the grower to maintain and verify the correctness of these lists. If you are unable to maintain your list, we have contract workers who will assist for a very small fee.

Non - members and growers who do not belong to any association hosted by the Growit Network can also enter plants to the nationwide Buyer's Guides. There is a **limit of 10 plants** that can be edited as needed. It is the responsibility of the grower making the entries to maintain and verify the correctness of these lists.

To Upload Plants or Make Changes to Plant Lists

Go to www.growit.com

Select **Edit/Update** from the Main Menu Sidebar

Choose update my plant listings online

Enter password and username exactly as shown - They are case sensitive.
for example - USERNAME **Wms** PASSWORD **brokers**

Click the box for **Edit/Create** my Plant List then press enter
The full genus list of plants in our database will appear on the left side panel.

Click on each genus to expand it on the right side. This will list the cultivars and varieties we have in the growit database.

If you have plants that we don't list, please send them by email to customerservice@growit.net (scientific name only) so they can be researched and added.

To place a plant on your list just click on the **YES** button. To remove-click on **NO**. To remove a plant from your list click on the **NO** button or remove the spec for that plant.

After you have finished all entries for that genus go to the bottom of the genus grouping and click update.

Enter ALL of your plants in this manner.

Then go to the bottom of any page in the right hand panel and click on **Display my plants.**

The plants you have put onto your list will appear on the left-hand panel.

Click on each one to enter the size, description, quantity and price.

It is mandatory that you enter a size or spec of some type, but the other fields are optional.

If you have more than one size, click on the button below the description to **add a spec.** This will add a new line. We suggest

that you add all the lines you need before entering any specs, then list them with the smallest first, etc.

Continue until all plants have been entered or edited as needed.
